

FUND MANAGER'S REPORT

May 2018

ECONOMIC REVIEW

Pakistan's economic scorecard worsened during last month with increase in inflation, high current account deficit, declining FX reserves and slowdown in LSM growth. Due to increased external account risks and inflationary pressure in the economy, central bank increased policy rate by 50bps to 6.5% in monetary policy announced towards month end.

CPI increase for May-18 clocked in at 4.2% YoY with MoM increase of 50bps, taking 11MFY18 CPI average to 3.8%. Higher CPI was mainly due to uptick in food prices (up 1.1% MoM) and transport (up 0.9% MoM). Despite lower CPI increase (headline), core inflation sustained at 7% YoY reflecting increasing demand pressures in the economy. LSM growth momentum slowed down during Mar-18 with growth of meagre 1.8% YoY, taking 9MFY18 LSM growth to 5.9% YoY. Coke & Petroleum products (+30%), Automobiles (+15%), and Non Metallic Mineral Product (+14%) were the highest contributors to overall growth during the month. Current Account Deficit for Apr-18 increased by 61% MoM to USD1.9bn, taking 10MFY18 CAD clocked in at USD 14.0bn (5.3% of GDP), due to continued weak trade balance (negative USD3bn) and other flows (Net primary transfers surged 37% MoM). Moreover, FX reserves of the country dropped by USD1.1bn during Apr-18 to USD 16.4bn which was mainly driven by declining SBP reserves as scheduled banks' reserves inched up slightly during the month.

Going forward, we expect policy makers to take more stringent steps to curb macroeconomic risks and secure sustainable growth of economy.

MONEY MARKET REVIEW

During the month of May-18, SBP conducted two T-bill auctions with a cumulative target of PKR 1,600bn against maturity of PKR 1,583bn. The participation was low in the second T-Bill auction as it was held a few days before MPS. The total accepted amount was PKR 480.5bn out of which PKR 478.6bn was for 3M tenor (excluding non-competitive bids). The cut-off yields remained unchanged at 6.2591% and 6.3519% for 3M and 6M tenor respectively while not a single bid was received in 12M tenor. SBP conducted PIB auction during third week of the month with a target of PKR50bn against maturity of PKR 2bn. Cumulative participation of PKR 28.2bn was received in 3Y, 5Y and 10Y tenors. The government accepted PKR 2.7bn, PKR 1.1bn and PKR 0.2bn in 3, 5 and 10 year tenors respectively. The cutoffs were 7.2003%, 8.0308% and 8.4738% for 3, 5 and 10 year tenors respectively.

In the last week, Government launched first-ever floating rate Pakistan Investment Bonds where coupon rate was decided to be latest 6-month MTB weighted average yield plus a margin determined through auction. Against the participation of PKR 174bn, government only accepted PKR 20.8bn (target of 50bn) at cut-off margin of 50bps over the benchmark. In the last week of the month, Government mopped up PKR 100bn at 6.41% p.a through an OMO. During the month, yields across all the tenors increased by 24-41bps after increase in policy rate.

Going forward, due to increased macroeconomic risks, we expect interest rate to increase by another 50 bps in current calendar year.

EQUITY MARKET REVIEW

Pakistan Equities remained under pressure during May-18 owing to continued foreign selling, increased political noise in the build up to the interim setup and thin volumes.

Pakistan equities benchmark KSE100 Index lost 2,642 points (5.8%) during the month. Weakness in the market was due to continued selling pressure from foreign investors. During the month, foreign investors divested stocks worth USD73mn which was largely absorbed by selected domestic investors to capitalize on better valuations. On a sectoral basis, banks (688 points) and cements (509 points) had the biggest drag on the index. HBL and UBL accounted for most of the decline as they dented index by 350 and 290 points respectively. Decline in cements continued as the sector remained marred by upcoming production capacities (two huge capacities announced recently) which have led to the fears of underutilization and possible margin compression.

Going forward, we expect the market to remain topsy-turvy owing to deteriorating macros and continued political noise as the country moves towards general elections (25th July 2018). However, these factors may open up valuations and offer good cherry picking opportunities. Thus, we will maintain our "bottom-up" strategy and focus on stocks which are relatively resilient to weak macros and have strong earnings potential.

Conventional Funds

INVESTMENT OBJECTIVE

The objective of the Fund is to seek high liquidity and comparative return for investors by investing in low risk securities of shorter duration and maturity.

FUND MANAGER'S COMMENTS

HBL Money Market Fund earned an annualized return of 4.89% against the benchmark return of 5.63%. Primary cause for this underperformance was valuation losses on short maturity treasury bills due to sharp adjustment of 50 bps in discount rate by SBP in last Monetary Policy. In order to remain vigilant on interest rates, we reduced the duration of the fund to 33 days from 61 days in April '18. On YTD basis, HBL MMF posted an annualized return of 5.25% compared to benchmark return of 5.30%. At the month end, investment in short maturity T-Bills was increased to 92.13% compared to 82.21% of total assets, while on the other hand placement with banks and Cash at bank stood at 7.34% and 0.45% of total assets respectively. Fund size increased by 8.49% to PKR 6,404 million compared to PKR 5,903 million in April '18. Going forward, we will manage the duration of the fund at minimum levels as we intend to increase exposure in placements and bank deposits at June end.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to provide competitive returns to its investors through active investments in low risk portfolio of short duration, while maintaining high liquidity. The Fund will aim to maximize returns through efficient utilization of investment and liquidity management tools.

FUND MANAGER'S COMMENTS

The fund earned an annualized return of 5.13% against the benchmark return of 5.63%. On MTD basis, HBL CF offered highest return in its category against the peer average of 4.78%. During the month, SBP increased the discount rate by 50 bps on account of risks emerged from twin deficit, low financial inflows and recent spike in core inflation. On YTD basis, HBL CF posted an annualized return of 5.43% versus the benchmark performance of 5.30%, an outperformance of 13 bps. During the month, the fund size increased to PKR 13,932 million from PKR 12,418 million in April '18. Investment in Treasury Bills was reduced to 75.53% in May compared to 82.92% of total assets in April while allocation in cash was increased to 9.11% compared to 0.46% in last month. Weighted average time to maturity of the fund reduced to 33 days as compared to 55 days in April '18. Going forward, we will manage the duration of the fund at minimum levels as we intend to increase exposure in bank deposits before June end.

INVESTMENT OBJECTIVE

The objective of the Fund is to provide a stable stream of income with moderate level of risk by investing in fixed income securities.

FUND MANAGER'S COMMENTS

The fund posted an annualized return of 6.39% against the benchmark return of 6.57%. Fund size increased by 3% to PKR 3,081 million from PKR 2,992 million in April'18. During the month, fund returns improved by 335 bps due to gains linked to TFCs. Exposure in Cash was increased to 35.36% from 19.47% in April, while investment in TFCs and Govt. backed instrument stood at 33.02% and 4.43% of total assets respectively. During the month, exposure in TDRs was reduced to 19.91% of total assets compared to 32.30% in last month. Going ahead, we will utilize this amount to place funds at higher rate on account of year end liquidity requirement and 50 bps increase in discount rate. Weighted average time to maturity of the fund reduced to 761 days against 805 days April' 18.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to provide consistent returns to its investors through active investments in a blend of short, medium and long term securities issued and / or guaranteed by Government of Pakistan. The Fund will aim to provide superior risk adjusted returns through active duration and liquidity management tools.

FUND MANAGER'S COMMENTS

The fund earned an annualized return of 4.83% (up 60 bps MoM) compared to the benchmark return of 6.43%. The Fund size remained static at PKR 314 million in May '18. On month end, exposure in Government securities and Bank deposit stood at 47.02% & 52.24% of total assets respectively. HBL Government Securities Fund (GSF) maintains minimum exposure of 70% in government securities (on monthly average) as per the regulatory requirement which enhance the asset quality and liquidity profile of the fund. During the month, we reduce our exposure in bonds consequently WAM of the fund was reduced to 4 days compared to 286 days in last month. Based on our interest rate outlook, we will manage the duration of the fund at minimum levels and look for trading opportunities to optimize the returns.

INVESTMENT OBJECTIVE

The objective of the Fund is to provide long-term capital growth and income by investing in multiple asset classes such as equity, equity-related instruments, fixed-income securities, continuous funding system, derivatives, money market instruments, etc.

FUND MANAGER'S COMMENTS

The fund posted a return of negative 2.38% during the month an outperformance of 78 bps compared to the benchmark return of -3.16%. The month of May was a setback to the domestic equity market as it retreated by 5.8% (2,642 points) taking the cumulative return for CY18 to 5.87%. Concerns on the deteriorating external account position, success of amnesty scheme, upcoming decision on Pakistan's inclusion in FATF grey list and political uncertainty took center stage. Aggressive foreign selling mainly in banks and cements further added to the woes as foreigners offloaded equities worth of USD 73 million which was mainly absorbed by the local insurance companies. Performance of the mainboard remained dismal with almost all key sectors ending in red. Sector wise, Cements (down 12.1% MoM) on fundamental concerns mainly pressure on margins, Automobiles and Parts (down 10.1% MoM) on short term concerns over demand emanating from the disallowance of non-filers to purchase cars in budget FY19. Electricity (down 7.5% MoM) particularly on account of delay in MYT for KEL, Commercial Banks (down 5.9% MoM) on account of aggressive foreign selling and Oil & Gas Exploration (down 2.5% MoM) despite higher oil prices were laggards. During the month allocation was largely maintained and the fund was invested in equities up to 55.82%. We believe that build up to next general elections will be a choppy ride for the market which will provide a decent entry point for long term investors looking for attractive returns.

INVESTMENT OBJECTIVE

The objective of the Fund is to provide long-term capital growth by investing primarily in a diversified pool of equities and equity-related instruments.

FUND MANAGER'S COMMENTS

The fund posted a return of negative 4.05% during the month an outperformance of 181 bps compared to the benchmark return of -5.86%. The month of May was a setback to the domestic equity market as it retreated by 5.8% (2,642 points) taking the cumulative return for CY18 to 5.87%. Concerns on the deteriorating external account position, success of amnesty scheme, upcoming decision on Pakistan's inclusion in FATF grey list and political uncertainty took center stage. Aggressive foreign selling mainly in banks and cements further added to the woes as foreigners offloaded equities worth of USD 73 million which was mainly absorbed by the local Insurance companies. Performance of the mainboard remained dismal with almost all key sectors ending in red. Sector wise, Cements (down 12.1% MoM) on fundamental concerns mainly pressure on margins, Automobiles and Parts (down 10.1% MoM) on short term concerns over demand emanating from the disallowance of non-filers to purchase cars in budget FY19. Electricity (down 7.5% MoM) particularly on account of delay in MYT for KEL, Commercial Banks (down 5.9% MoM) on account of aggressive foreign selling and Oil & Gas Exploration (down 2.5% MoM) despite higher oil prices were laggards. During the month allocation was largely maintained, the notable change was the decrease in exposure in Power Generation & Distribution. The fund was invested in equities up to 86.31%. We believe that build up to next general elections will be a choppy ride for the market which will provide a decent entry point for long term investors looking for attractive returns.

Please read the Offering Document to understand the investment policies and risks involved including risk disclosure for special feature.

INVESTMENT OBJECTIVE

The objective is to invest in securities defined in the energy sector to provide investors access to high quality blue chip stocks in the Energy sector.

FUND MANAGER'S COMMENTS

The fund posted a return of -4.33% during the month, outperforming the benchmark by 1.53%. The benchmark KSE-30 (Total Return) Index decreased by 5.86% M/M during May'18 (vs. a decrease of 1.41% M/M during Apr'18). The market remained under pressure throughout the month, as aggressive foreign selling amidst thin volumes coupled with heightened political noise, concerns over deteriorating macros and upcoming decision over inclusion of Pakistan in the FATF grey list kept investor sentiment in check. During the month, we marginally increased our exposure to Oil & Gas Exploration companies while reducing exposure to Oil & Gas Marketing Companies, Refineries and Power Generation & Distribution sectors. At the end of the month, your fund was 87.82% invested in equities.

INVESTMENT OBJECTIVE

To maximize the wealth of the certificate holders for which investments would be made in the best available opportunities, while considering acceptable risk parameters and applicable rules and regulations.

FUND MANAGER'S COMMENTS

The fund posted a return of -5.99% during the month against the benchmark performance of -5.81%. The main reason for underperformance was the hammering taken by SNGPL. On an ex-frozen basis, the fund posted a return of -4.51% outperforming the benchmark by 1.30%. The market remained under pressure throughout the month, as aggressive foreign selling amidst thin volumes coupled with heightened political noise, concerns over deteriorating macros and upcoming decision over inclusion of Pakistan in the FATF grey list kept investor sentiment in check. During the month, exposures were marginally increased across Oil & Gas exploration companies, Commercial Banks, and Fertilizers while we booked gains in Oil & Gas marketing companies and other sectors. Moving forward, we expect the market to remain topsy turvy due to continued macro-economic concerns and political noise leading up to the general elections. At the end of the month, your fund was 92.70% invested in equities.

Islamic Funds

INVESTMENT OBJECTIVE

The objective of HBL Islamic Money Market Fund is to seek high liquidity, competitive return and maximum possible preservation of capital for investors by investment in low risk Shariah Compliant securities.

FUND MANAGER'S COMMENTS

The fund earned an annualized return of 4.18% compared to the benchmark return of 2.60%, an outperformance of 158 bps. On YTD basis, HBL IMMF yielded an annualized return of 4.19%, showing an outperformance of 161 bps over the benchmark. Fund size closed at PKR 855 million compared to PKR 815 million in April '18. HBL Islamic Money Market aims to deliver competitive returns to investors, keeping in mind short term liquidity requirements while taking minimum amount of risk. At the end of the month, weighted average maturity of the fund stood at 1 day as 99.53% fund placed in highly liquid bank's deposits. Going forward, we anticipate competitive returns due to placements at higher rates on year end.

INVESTMENT OBJECTIVE

The Investment Objective of the Fund is to provide competitive risk adjusted returns to its investors by investing in a diversified portfolio of long, medium and short term Shariah compliant debt instruments while taking in to account liquidity considerations.

FUND MANAGER'S COMMENTS

The fund earned an annualized return of 5.30% for the month of May compared to the benchmark performance of 2.36%, showing an outperformance of 294 bps. On YTD basis, HBL IIF is one of the best performing funds amongst its peer group, the fund posted an annualized return of 5.12% compared to industry average of 4.24% and benchmark performance of 2.45%. Fund size stood at PKR 4,534 million compared to PKR 4,829 million in April'18. At the end of the month, asset allocation comprised of (as percentage of total assets) 57.27% investment in bank deposits and 7.48% exposure in short term placements with Islamic Institutions. On the other hand, exposure in Corporate Sukuk and CPs stood at 30.64% & 3.67% of total assets respectively. The weighted average time to maturity (WAM) of the portfolio was increased to 570 days compared to 498 days due to redemptions. Going forward, we intend to increase exposure in good rated corporate Sukuk to augment the returns.

INVESTMENT OBJECTIVE

The objective of the Fund is to provide superior returns through investments in Shariah Compliant equity securities and Shariah Compliant income /money market instruments.

FUND MANAGER'S COMMENTS

The fund posted a return of negative 0.90% during the month an outperformance of 28 bps compared to the benchmark return of -1.18%. The month of May was a setback to the domestic equity market as it retreated by 5.8% (2,642 points) taking the cumulative return for CY18 to 5.87%. Concerns on the deteriorating external account position, success of amnesty scheme, upcoming decision on Pakistan's inclusion in FATF grey list and political uncertainty took center stage. Aggressive foreign selling mainly in banks and cements further added to the woes as foreigners offloaded equities worth of USD 73 million which was mainly absorbed by the local Insurance companies. Performance of the mainboard remained dismal with almost all key sectors ending in red. Sector wise, Cements (down 12.1% MoM) on fundamental concerns mainly pressure on margins, Automobiles and Parts (down 10.1% MoM) on short term concerns over demand emanating from the disallowance of non-filers to purchase cars in budget FY19. Electricity (down 7.5% MoM) particularly on account of delay in MYT for KEL, Commercial Banks (down 5.9% MoM) on account of aggressive foreign selling and Oil & Gas Exploration (down 2.5% MoM) despite higher oil prices were laggards. During the month portfolio was tweaked as exposure in Oil & Gas Marketing companies and Oil & Gas Exploration companies was reduced while exposure in Cements was increased. The fund was invested in equities up to 26.50%. We believe that build up to next general elections will be a choppy ride for the market which will provide a decent entry point for long term investors looking for attractive returns.
