## ECONOMIC REVIEW

Due to the damage caused by recent floods, the GDP growth rate is expected to slow down to 2.0% in FY23 compared to the initial target of 5.0% and actual growth of 5.97% in FY22. SBP/ADB/World Bank projection of growth stands at 2.0%/3.5%/2.0%. As per estimates, total damages caused by the floods stand at ~USD 46.4bn. Rehabilitation efforts would increase the budget deficit to 7.9% which initially has been projected at 4.9% in FY23. In 4MFY23 fiscal deficit was recorded at 1.5% of GDP vs 0.9% in SPLY. Positive developments have been the international sukuk repayment of USD 1.08bn, rollover of USD 3.0bn deposit by Saudi Arabia, approval of USD 0.5bn from ADB for flood rehabilitation, Russia agreeing to sell oil to Pakistan at a discounted price and the formation of a circular debt resolution committee. Negative developments have been the decrease in foreign exchange reserves to an eight year low of USD 5.8bn, delay in the IMF 9th review and escalated Political tensions after Imran Khan announced the dissolution of Punjab and KPK assembly.

CAD for Nov-22 clocked in at USD 0.28bn, compared to USD 0.57/1.93bn during Oct-22/Nov-21. The MoM and YoY decrease in CAD is primarily due to decrease in imports and service trade deficit. However, remittances have declined by 5%/14% M/M and Y/Y respectively. CAD for 5MFY23 registered at USD 3.1bn compared to USD 7.2bn last year.

CPI for Dec-22 clocked in at 24.5% YoY, compared to 12.3% during the SPLY. On a MoM basis, CPI increased by 0.5%, largely driven by increase in foods and beverages items.

We expect economic growth to slow down to ~2.0% in FY23 on the back of economic losses caused by the floods along with fiscal consolidation. Focus would remain on curbing inflation, and maintaining economic growth at a sustainable level, while keeping the external and fiscal accounts in check.

## MONEY MARKET REVIEW

During Dec-22, SBP conducted two T-bills auction with a target of PKR 2,000bn. Total amount accepted was PKR 2,026bn against maturity of PKR 2,700bn. Cut-off yields in the last T-bills auction were 16.9980%, 16.8255%, and 16.8500% for 3M, 6M and 12M tenors, respectively.

The SBP also conducted a Fixed PIBs auction on 21-Dec-22, with a target of PKR 175bn. Bids for all tenures were rejected.

A GOP Ijara Sukuk auction was held on 08-Dec-22, with a target of PKR 100bn (PKR 30bn for Fixed Rental and PKR 70bn for Variable Rental Rate) for a period of 5 years. The Ministry of Finance accepted bids worth PKR 64bn (at 16.05%) in VRR Sukuk and PKR 25.00bn (at 12.49%) FRR Sukuk.

In its meeting held on 25-Nov-22, the Monetary Policy Committee (MPC) increase the Policy Rate to 16.0%, citing persistent and stronger inflationary pressure. We believe that imposition of PDL and taxes on fuel, high commodity prices, recent crop and infrastructure damage by the floods and depreciating PKR will translate adversely in CPI.

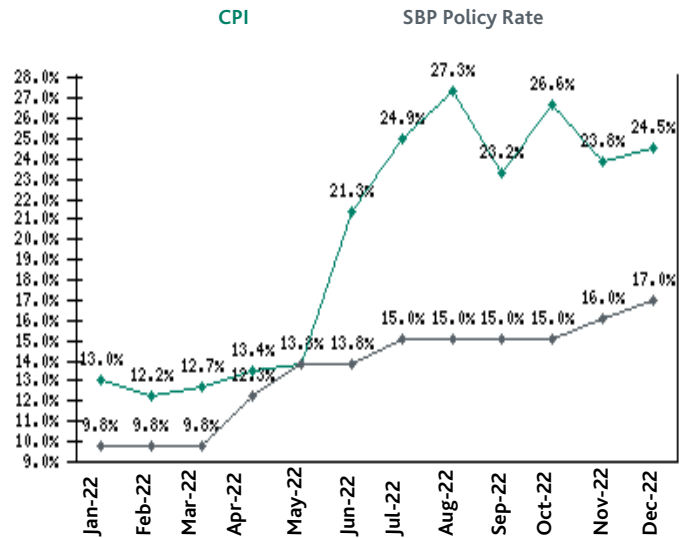

## EQUITY MARKET REVIEW

The equity market stayed negative in the month of Dec-22 and shed 1,928 points. Market remained in bearish zone throughout the month because of political uncertainty, delay in revival of IMF program, downgrading of Pakistan's sovereign rating by S&P, decline in remittances and decrease in foreign exchange reserves. Market gained some strength in the last week due to renewed interest in oil and gas sector as government constitute committee to resolve circular debt. Market gained 751 points in last week and eventually closed the month at 40,420 level, down 4.6% MoM.

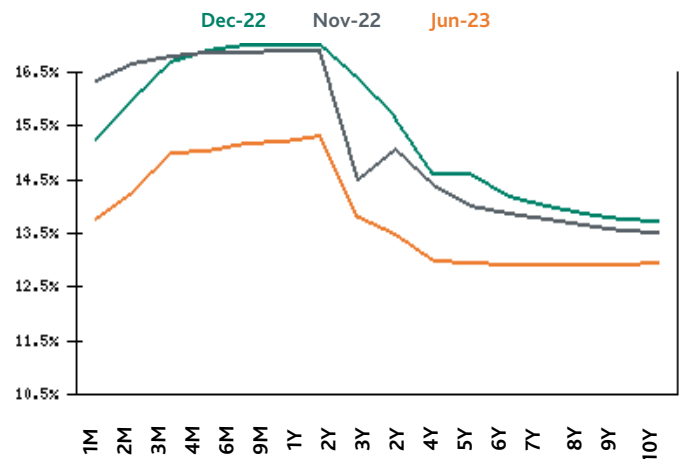

Average traded volume during Dec-22 increased by 5% (to 87mn shares) while traded value decreased by 12% (to PKR 4,093mn) MoM, respectively. Positive index contribution was led by Miscellaneous (472pts), and Oil and Gas Exploration (206pts), while negative index contribution came from Technology and Communication (348pts), Automobile Assemblers (195pts) and Commercial Banks (119pts).

We expect the equity market to remain range-bound in the near-term due to inflationary concerns, high interest rate environment, demand destruction caused by the ongoing floods and rebound in oil prices. However, our longer-term equity outlook remains positive due to attractive valuations. Reversal in international commodity prices due to slow down in major economies may reignite investor interest in equities.

# Conventional Funds

### INVESTMENT OBJECTIVE

The objective of the Fund is to seek high liquidity and comparative return for investors by investing in low risk securities of shorter duration and maturity.

### FUND MANAGER'S COMMENTS

HBL Money Market Fund earned an annualized return of 14.95%, posting an improvement of 327 bps when compared to last month. Fund size of HBLMMF increased by 1.23% to close at PKR 11,542mn compared to PKR 11,402mn in November, 2022.

During the month, exposure in T-bills were trimmed and shifted to Placement with Banks and in Cash. At the end of the month, allocation in T-bills, Short Term Sukuk, Placements with Banks and Commercial Paper were recorded at 68.04%, 14.32%, 9.43% and 4.98% respectively. This assisted the Fund Manager in reducing the time to maturity of the fund to 31 days from 61 days in November, 2022.

Going forward, we expect the fund to provide market competitive returns as the market is expected to remain liquid in the short term until there is any clarity on the MPS scheduled during the later part of January.

### INVESTMENT OBJECTIVE

The objective of the Fund is to provide long-term capital growth and income by investing in multiple asset classes such as equity, equity-related instruments, fixed-income securities, continuous funding system, derivatives, money market instruments, etc.

### FUND MANAGER'S COMMENTS

HBL Multi Asset Fund posted a return of -0.24% during Dec, 2022 against the benchmark return of -1.86%. Fund size of HBL MAF increased by 51.47% to close at PKR 103mn compared to PKR 68mn in November, 2022.

The equity market stayed negative in the month of Dec-22 and shed 1,928 points. Market remained in bearish zone throughout the month because of political uncertainty, delay in revival of IMF program, downgrading of Pakistan's sovereign rating by S&P, decline in remittances and decrease in foreign exchange reserves. Market gained some strength in the last week due to renewed interest in oil and gas sector as government constitute committee to resolve circular debt. Market gained 751 points in last week and eventually closed the month at 40,420 level, down 4.6% MoM.

Average traded volume during Dec-22 increase by 5% (to 87mn shares) while traded value decrease by 12% (to PKR 4,093mn) MoM, respectively. Positive index contribution was led by Miscellaneous (472pts), and Oil and Gas Exploration (206pts), while negative index contribution came from Technology and Communication (348pts), Automobile Assemblers (195pts) and Commercial Banks (119pts).

We expect the equity market to remain range-bound in the near-term due to inflationary concerns, high interest rate environment, demand destruction caused by the ongoing floods and rebound in oil prices. However, our longer-term equity outlook remains positive due to attractive valuations. Reversal in international commodity prices due to slow down in major economies may reignite investor interest in equities.

## INVESTMENT OBJECTIVE

The objective of HBL Growth Fund is to maximize the wealth of the unit holders by investing primarily in listed equities in the best available opportunities, while considering acceptable risk parameters and applicable rules and regulations.

## FUND MANAGER'S COMMENTS

HBL Growth Fund - Class B posted a return of -2.18% during Dec, 2022 against the benchmark return of -4.55%. Fund size of HBL GF(B) decreased by 3.79% to close at PKR 915mn compared to PKR 951mn in November, 2022.

The equity market stayed negative in the month of Dec-22 and shed 1,928 points. Market remained in bearish zone throughout the month because of political uncertainty, delay in revival of IMF program, downgrading of Pakistan's sovereign rating by S&P, decline in remittances and decrease in foreign exchange reserves. Market gained some strength in the last week due to renewed interest in oil and gas sector as government constitute committee to resolve circular debt. Market gained 751 points in last week and eventually closed the month at 40,420 level, down 4.6% MoM.

Average traded volume during Dec-22 increase by 5% (to 87mn shares) while traded value decrease by 12% (to PKR 4,093mn) MoM, respectively. Positive index contribution was led by Miscellaneous (472pts), and Oil and Gas Exploration (206pts), while negative index contribution came from Technology and Communication (348pts), Automobile Assemblers (195pts) and Commercial Banks (119pts).

We expect the equity market to remain range-bound in the near-term due to inflationary concerns, high interest rate environment, demand destruction caused by the ongoing floods and rebound in oil prices. However, our longer-term equity outlook remains positive due to attractive valuations. Reversal in international commodity prices due to slow down in major economies may reignite investor interest in equities.

### INVESTMENT OBJECTIVE

The objective of the Fund is to provide superior returns through investments in Shariah Compliant equity securities and Shariah Compliant income /money market instruments.

### FUND MANAGER'S COMMENTS

HBL Islamic Asset Allocation Fund posted a return of -4.29% during Dec, 2022 against the benchmark return of -4.13%. Fund size of HBL IAAF decreased by 9.60% to close at PKR 113mn compared to PKR 125mn in November, 2022.

The equity market stayed negative in the month of Dec-22 and shed 1,928 points. Market remained in bearish zone throughout the month because of political uncertainty, delay in revival of IMF program, downgrading of Pakistan's sovereign rating by S&P, decline in remittances and decrease in foreign exchange reserves. Market gained some strength in the last week due to renewed interest in oil and gas sector as government constitute committee to resolve circular debt. Market gained 751 points in last week and eventually closed the month at 40,420 level, down 4.6% MoM.

Average traded volume during Dec-22 increase by 5% (to 87mn shares) while traded value decrease by 12% (to PKR 4,093mn) MoM, respectively. Positive index contribution was led by Miscellaneous (472pts), and Oil and Gas Exploration (206pts), while negative index contribution came from Technology and Communication (348pts), Automobile Assemblers (195pts) and Commercial Banks (119pts).

We expect the equity market to remain range-bound in the near-term due to inflationary concerns, high interest rate environment, demand destruction caused by the ongoing floods and rebound in oil prices. However, our longer-term equity outlook remains positive due to attractive valuations. Reversal in international commodity prices due to slow down in major economies may reignite investor interest in equities.

### INVESTMENT OBJECTIVE

The objective of the Fund is to provide the maximum total return to the unit holders from investment in shariah compliant equity investments for the given level of risk.

### FUND MANAGER'S COMMENTS

HBL Islamic Equity Fund posted a return of -2.48% during Dec, 2022 against the benchmark return of -4.86%. Fund size of HBL-ISQF decreased by 21.90% to close at PKR 107mn compared to PKR 137mn in November, 2022.

The equity market stayed negative in the month of Dec-22 and shed 1,928 points. Market remained in bearish zone throughout the month because of political uncertainty, delay in revival of IMF program, downgrading of Pakistan's sovereign rating by S&P, decline in remittances and decrease in foreign exchange reserves. Market gained some strength in the last week due to renewed interest in oil and gas sector as government constitute committee to resolve circular debt. Market gained 751 points in last week and eventually closed the month at 40,420 level, down 4.6% MoM.

Average traded volume during Dec-22 increase by 5% (to 87mn shares) while traded value decrease by 12% (to PKR 4,093mn) MoM, respectively. Positive index contribution was led by Miscellaneous (472pts), and Oil and Gas Exploration (206pts), while negative index contribution came from Technology and Communication (348pts), Automobile Assemblers (195pts) and Commercial Banks (119pts).

We expect the equity market to remain range-bound in the near-term due to inflationary concerns, high interest rate environment, demand destruction caused by the ongoing floods and rebound in oil prices. However, our longer-term equity outlook remains positive due to attractive valuations. Reversal in international commodity prices due to slow down in major economies may reignite investor interest in equities.
