## ECONOMIC REVIEW

Headline inflation (CPI) clocked in at 4.30% Y/Y for the month of Dec'14 (vs. 3.97% Y/Y recorded for the month of Nov'14) taking average CPI to clock in at 6.11% during 1hFy15. On a sequential basis, CPI recorded a decline of 1.01% M/M during Dec'14 (down 0.51% M/M during Nov'14). The measurable sequential decline in CPI is largely due to a reduction (down 2.30% M/M) in the Food segment (CPI basket weight: 34.83%) and a 2.93% M/M decline in the Transport segment (CPI basket weight: 7.2%) as domestic petroleum prices were slashed on the back of lower international oil prices. However, risks to CPI exist via fiscal adjustments (administered price changes) to raise revenue through

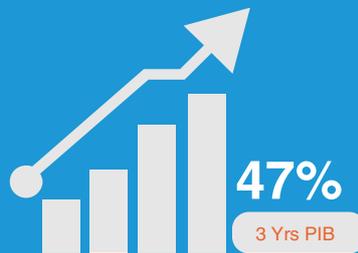

the phasing out of power subsidies (subsequent higher domestic gas and electricity prices). With regards to improving macro-economic indicators, lower trending CPI accompanied by reduction in NSS and bond yields have strengthened the case for further monetary easing in Jan'15 while inflows (viz. privatization and release of IMF's ~USD 1.1bn tranche) have improved the external account outlook. The decline in international oil prices coupled with upcoming privatization transactions (e.g. HBL) provides further cushion to the external account. Going forward, domestic POL prices can be expected to be further brought down in line with the weakness in international oil prices which should keep the inflationary outlook benign and along with the optimism on the

external account can encourage the SBP to continue with the monetary easing cycle.

## MONEY MARKET REVIEW

During the period under review, SBP conducted T-bill auctions twice with a cumulative target of PKR 175bn against maturity of PKR 97bn. Cumulative participation in the auction was PKR179.3bn and the amount accepted was PKR121.6bn (both amounts excluding non-competitive bids). SBP also conducted a PIB auction on December 18, 2014 (against a target of PKR50bn) where participation of PKR332.4bn

(face value) was witnessed while the government accepted an amount of PKR151.4bn. Participation in the 3years PIBs attracted 47%, while 10years attracted 33% of the

entire participation. The cut-off yields were 10.5979% for the 3 years tenor (face value PKR 91.2bn), followed by 10.7994% in the 5 years tenor (face value PKR24.3bn) and 11.7049% in the 10 years tenor (face value PKR 35.8bn).

## EQUITY MARKET REVIEW

**The KSE100 Index gained 2.99% M/M (KMI30 Index gained 1.90% M/M) during Dec'14, taking total return to 27.20% in Cy14 (KMI30 gained 19.57% in Cy14). Average volumes**

marginally contracted by 2.03% M/M to 248mn shares traded in Dec'14. Dec'14 also witnessed net foreign outflows of USD 49.50mn (net foreign inflows have clocked in at USD 382.54mn in Cy14, down 3.91% Y/Y) against net foreign inflows (USD 36.33mn)

recorded in Nov'14. Activity at the exchange remained relatively robust during Dec'14 as improving macros prevailed over heightened political and law & order concerns. In this regard, lower trending CPI accompanied by reduction in NSS and bond yields have strengthened the case for further monetary easing in Jan'15 while inflows (viz. privatization and release of IMF's ~USD 1.1bn tranche) have improved the external account outlook. Going forward, the market may bounce around from the vagaries of the political environment. That being said, we flag 1) Continuation of the monetary easing cycle in the backdrop of a soft inflationary outlook, 2) Political consensus in implementing reforms, 3) Stability on the external account (benefit of lower international oil prices to curb the import bill), 4) Successful completion of the on-going military offensive in the tribal regions, and 5) Continued foreign inflows in equities, as key short to medium term re-rating triggers for the index.

**FUND STRATEGY**

The NAV of PEF declined by 0.20% during Dec'14, underperforming the benchmark by 3.19% during the review period. A continuous fall in international oil prices (Arab Light down ~17% M/M) during Dec'14 kept the price performance of energy sector companies in check. In this regard, amongst our major holdings, POL, PPL and APL lost 15.05%, 6.91% and 3.58% during the review period. However, other portfolio companies viz. LPL, NCPL and KAPCO gained 10.50%, 1.72% and 11.14% during Dec'14. We will continue to recalibrate our energy composite portfolio to maximize returns, whilst ensuring adequate levels of cash in order to meet the redemption requests of our valued investors

### FUND STRATEGY

The NAV of PGF increased by 2.08% on an Ex-frozen basis (underperforming the benchmark by 0.91%), while it gained 2.26% on a Total Return basis (underperforming the benchmark by 0.74%) during Dec'14. The KSE100 Index gained 2.99% M/M (KMI30 Index gained 1.90% M/M) during Dec'14, taking total return to 27.20% in Cy14. Activity at the exchange remained relatively robust during Dec'14 as improving macros prevailed over heightened political and law & order concerns. In this regard, lower trending CPI accompanied by reduction in NSS and bond yields have strengthened the case for further monetary easing in Jan'15 while inflows have improved the external account outlook. Going forward, we flag 1) Continuation of the monetary easing cycle in the backdrop of a soft inflationary outlook, 2) Political consensus in implementing reforms, 3) Stability on the external account (benefit of lower international oil prices to curb the import bill), 4) Successful completion of the on-going military offensive in the tribal regions, and 5) Continued foreign inflows in equities, as key short to medium term re-rating triggers for the index. We will continue to evaluate the market for new investment opportunities that would benefit our valued investors, whilst maintaining our blue chip investment profile.
