Fund Manager's Report OCTOBER 2014

Managed By

AMC Rating: AM2- by JCR-VIS

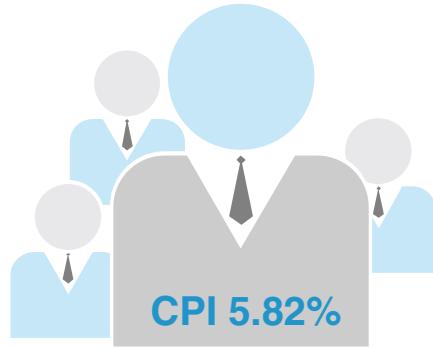

A wholly owned subsidiary of

NIB Bank Ltd.

ECONOMIC REVIEW

Headline inflation (CPI) clocked in at 5.82% Y/Y for the month of Oct'14 (vs. 7.68% Y/Y recorded for the month of Sep'14) largely due to lower food prices and a high base effect. On a sequential basis, CPI recorded a growth of 0.21% M/M during Oct'14 (up 0.35% M/M during Sep'14), which was primarily driven by a quarterly upward revision in the house rent index. Going forward, while risks to CPI exist via fiscal adjustments (administered price changes) to raise revenue through the phasing out of power subsidies (subsequent higher domestic gas and electricity prices), a sharp contraction in international oil prices and subsequent decrease in domestic POL prices should exert downward pressure

on the food and transport segment. On the external front, Pakistan's current account (CA) recorded a deficit of USD 1,330mn during 1qFy15 (Jul'14-Sep'14), against a deficit of USD 1,268mn recorded in the same period last year. Looking for positives, a ~25% contraction in international oil prices during Fy15TD should provide some cushion to the external account. In the backdrop of delays in projected foreign inflows mobilization, the PKR has depreciated by 4% Fy15TD against the USD. With political temperature coming down during the review period, we expect the government to once again focus on its economic agenda of stimulation growth and correcting imbalances in the economy.

MONEY MARKET REVIEW

During the period under review, SBP conducted three T-bill auctions with a cumulative target of PKR 550bn against maturity of PKR 482.7bn. Cumulative participation in the auction was PKR 351.7bn and the amount accepted was PKR 349.3bn (both amounts excluding non-competitive bids). SBP also conducted a PIB auction on October 22, 2014, where a participation of PKR 331.8bn (face value) was witnessed

against a target of PKR 50bn, and the government accepted an amount of PKR 50.3bn. Participation in the 3 years PIBs attracted 40.3%, while 5 years attracted 40.0% of the

entire participation. The cut-off yields were 12.4803% for the 3 years tenor (face value PKR 20.3bn), followed by 12.9770% in the 5 years tenor (face value PKR 20.1bn) and 13.4494% in the 10 years tenor (face value PKR 9.9bn). Furthermore, the Government of Pakistan through its Open Market Operation has rolled over the amount of PKR 56bn maturing in the GOP Ijarah IX at 9.95% for a tenor of 6months under the contract of Bai Muajjal.

EQUITY MARKET REVIEW

Supplemented by softening risk perceptions, sustained corporate profitability and encouraging macro developments, the KSE100 Index gained 2.19% M/M

(KMI30 Index gained 0.66% M/M) during Oct'14 despite a sharp decline in international oil prices (Arab Light contracted by 14% M/M) and continued foreign outflows. Looking for positives, risk perceptions softened as one of the parties to the impasse

(Pakistan Awami Tehreek / PAT) led by Dr. Muhammad Tahir-ul-Qadri decided to end the sit-in protest at Islamabad after 70 days. In this backdrop, locals stepped up to counter net foreign outflows of USD 31.05mn in Oct'14 (vs. inflows of USD 53mn in Sep'14) - net foreign inflows have clocked in at ~USD 395.72mn during Cy14TD. Average volumes improved to 176mn shares in Oct'14, up 17% M/M. Going forward, the market may bounce around from the vagaries of the political environment. However, despite short term pressures delaying reforms, long term economic direction should likely stay on course, in our view. We flag 1) Political consensus in implementing reforms, 2) Stability on the external account (privatization inflows), 3) Successful completion of the on-going military offensive in the tribal regions, and 4) Continued foreign inflows in equities, as key short to medium term re-rating triggers for the index.

October 2014

PICIC CASH FUND (PICIC-CF)

INVESTMENT OBJECTIVE:

To provide competitive returns to its investors through active investments in low risk portfolio of short duration, while maintaining high liquidity. The Fund aims to maximize returns through efficient utilization of investment and liquidity management tools.

FUND STRATEGY

During the month of October, the fund size witnessed a decline of PKR 59mn. The current fund size was PKR 587mn against PKR 646mn in September 2014. The fund made an annualized return of 7.81% for the month. The Fund manager adopted a cautious stance by staying liquid as the yields offered on GoP Ijarah Sukuk and Corporate Sukuks remained on the lower side, since there was no fresh issue of GOP Ijarah Sukuks except the partial rollover of GOP Ijarah Sukuk VIII. The fund manager is actively pursuing for quality Assets/ Sukuks to further increase the fund's return.

Oil & Gas Development Co	0**

FUND STRATEGY

The NAV of PEF increased by 1.12% during Oct'14, underperforming the benchmark by 1.07% during the review period. A sharp decline in international oil prices (Arab Light down 14% M/M) during Oct'14 kept the price performance of energy sector companies in check. In this regard, amongst our major holdings, POL, PPL and PSO lost 6%, 6% and 2% during the review period. However, other portfolio companies viz. KAPCO and APL gained 13% and 5% during Oct'14. We will continue to recalibrate our energy composite portfolio to maximize returns, whilst ensuring adequate levels of cash in order to meet the redemption requests of our valued investors.

Others	10	10
Total	85	90

FUND STRATEGY

The NAV of PGF increased by 5.60% on an Ex-frozen basis (outperforming the benchmark by 3.41%), while it gained 0.97% on a Total Return basis (underperforming the benchmark by 1.22%) during Oct'14. Supplemented by softening risk perceptions, sustained corporate profitability and encouraging macro developments, the KSE100 Index gained 2.19% M/M during Oct'14 despite a sharp decline in international oil prices and continued foreign outflows. Looking for positives, risk perceptions softened as one of the parties to the impasse (Pakistan Awami Tehreek / PAT) decided to end the sit-in protest at Islamabad after 70 days. In this backdrop, locals stepped up to counter net foreign outflows of USD 31.05mn in Oct'14 (vs. inflows of USD 53mn in Sep'14). Going forward, the market may bounce around from the vagaries of the political environment. However, despite short term pressures delaying reforms, long term economic direction should likely stay on course, in our view. We flag 1) Political consensus in implementing reforms, 2) Stability on the external account (privatization inflows), 3) Successful completion of the on-going military offensive in the tribal regions, and 4) Continued foreign inflows in equities, as key short to medium term re-rating triggers for the index. We will continue to evaluate the market for new investment opportunities that would benefit our valued investors, whilst maintaining our blue chip investment profile.
