2.7 Risk Disclosure

Investors must note that investments in mutual funds are subject to various risks. A targeted return/dividend range cannot be guaranteed. It should be clearly understood that the investment portfolio of HBL-IF is subject to market fluctuations and other risks inherent in all such investments. The risk emanates from various factors that include, but are not limited to:

2.8.1 Credit Risk

Credit risk is comprised of default risk, credit spread risk and downgrade risk. Each can have a negative impact on the value of a fixed-income security including money market instruments.

a) Default risk is the risk that the issuer of the security will not be able to pay the obligation, either on time or at all.

b) Credit spread risk is the risk that there may be an increase in the difference between the return/mark-up rate of an issuer's bond and the return/mark-up rate of a bond that is considered to have little associated risk (such as a government guaranteed bond or treasury bill). The difference between this return/mark-up rates is called a "credit spread". Credit spreads are based on macroeconomic events in the domestic or global financial markets. An increase in credit spread will decrease the value of fixed income securities including money market instruments.

c) Downgrade risk is the risk that a credit rating agency, such as PACRA or JCR- VIS or any other reputed international credit rating agency may reduce the credit rating of an issuer's securities. Downgrades in credit rating will decrease the value of those fixed income securities including money market instruments.

2.8.2 Interest Rate Risk

Debt securities including money market instruments, government securities or corporate debt securities generally pay a fixed rate of coupon/mark-up. The value of the Fund due to its holding in debt securities will rise and fall as market interest rates change. When interest rates rise, the value of an existing fixed income debt security will fall because the coupon rate on that bond is less than prevailing return/mark-up rates and vice versa.

2.8.3 Counterparty Risk

The risks with repo / reverse repo / money market placement transactions are that the other party

²¹ Amended through 2nd Supplement in the Offering Document dated 24th February, 2011

²² Amended through 2nd Supplement in the Offering Document dated 24th February, 2011

may default under the agreement or go bankrupt. In a reverse repurchase transaction, the Fund may be left holding the security and may not be able to sell it at the same price it paid for it, plus return/mark-up, if the market value of the security has dropped. In the case of a repurchase transaction, the Fund could incur a loss if the value of the security sold has increased more than the value of the cash or collateral held.

2.8.4 Risk Associated with Investing in Continuous Funding System

In case of default by the counter party, the Fund may be subject to settlement risk in extreme circumstances. In such circumstances the Fund may be exposed to market fluctuation risks associated with that specific security.

2.8.5 Risk Associated with Unlisted Debts

Generally the liquidity risk in case of unlisted debt security is higher compared to listed securities.

2.8.6 Voluminous Purchase/Redemption of Fund Units Risk

Any significant transaction made by any investor could significantly impact a Fund's cash flow. If the third party buys large amounts of Units of a Fund, the Fund could temporarily have a high cash balance. Conversely, if the third party redeems large amounts of Units of a Fund, the Fund may be required to fund the redemption by selling securities at an inopportune time. This unexpected sale may have a negative impact on the performance of the Fund.

2.8.7 Derivative Risk

Derivatives may be used to limit or hedge potential losses associated with capital markets and return/mark-up/coupon rates. This process is called "hedging".

Derivatives may also be used for non-hedging purposes - to reduce transaction costs, achieve greater liquidity, create effective exposure to financial markets or increase speed and flexibility in making portfolio changes. Any use of derivatives has risks, including:

- a) The hedging strategy may not be effective.
- b) There is no guarantee that a market will exist when a Fund wants to buy or sell the derivative contract.
- c) A large percentage of the assets of a Fund may be placed on deposit with one or more counter parties, which exposes the Fund to the credit risk of those counterparties.
- d) There is no guarantee that an acceptable counterpart will be willing to enter into the derivative contract.
- e) The counter-party to the derivative contract may not be able to meet its obligations.
- f) The Exchanges on which the derivative contracts are traded may set daily trading limits, preventing a Fund from closing out a particular contract.
- g) If an Exchange halts trading in any particular derivative contract, a Fund may not be able to close out its position in that contract.
- h) The price of a derivative may not accurately reflect the value of the underlying security or index.

2.8.8 Currency Risk

The Fund may be affected favorably or unfavorably by changes in currencies and exchange control regulations. The income earned by HBL-IF may also be affected by fluctuations in foreign exchange rates.

2.8.9 Other Risks Involved:

- a) Mismanagement of the investee company, third party liability whether through class action or otherwise or occurrence of other events such as strikes, fraud etc., in the company in which the investment is made.
- b) Break down of law and order, war, terrorist activity, natural disasters etc.
- c) Senior rights of some creditors over other creditors in the event of winding up.
- d) Volatility in prices resulting from their dependence on market sentiment, speculative activities, supply and demand for the securities and liquidity in the market.

Introduction:

HBL Asset Management Limited intends to introduce an Administrative Plan, namely the HBL Systematic Savings Plan (SSP), in the Collective Investment Schemes mentioned above. Currently, the underlying funds of HBL SSP do not contain provisions in their respective Offering Documents for the launch of an Administrative Plan; therefore the inclusion of such provisions is required.

HBL Systematic Saving Plans (HBL SSP) is an administrative Plan offered by HBL Asset Management Limited (HBL AMC) to provide the unit holders a customized investment approach to meet long term investment needs with the added comfort of optional different types of Insurance/Takaful coverage under the benefit of waiver of premium for the completion of plans for the nominated survivor(s) in case of unfortunate event of death, disability and/or critical illness of the plan holder. This Plan allows investors to invest periodically in a portfolio as per their risk profile and investment horizon. HBL AMC may re-allocate the client’s portfolio up to four (4) times in a year to ensure that the asset allocation remains in line with the Plan’s policies.

In line with the objective of HBL AMC to provide best investment options along with value added services in the Mutual funds industry, an initiative has been taken to provide one of a kind Insurance/Takaful coverage to the investors with minimal premium paid by these investors matching their savings plan contribution frequency.

- 4.2.9 a) The payment shall be processed by the Management Company on the 25th of each month. Provided that if 25th of the last month of a certain regular interval is not a Dealing Day the redemption arrangement of Income Units would be transferred to the next Dealing Day.
- 4.2.10 a) In case the Management Company announces a suspension of further issue of Units of the Fund, it may allow existing Unit Holders to continue acquiring Units out of any dividend declared under above options.
- 4.2.11 a) The Unit Holder may switch over any of the options or withdraw funds from the option at any stage by submitting the prescribed form to the Distributor/ Management Company.
- 4.2.12 a) This Administrative Plan may be discontinued by the Management Company at any time after seeking approval of the Commission by giving a prior notice of 30 days to the Unit Holders. All units in issue shall be treated as Units of the Fund from there on.
- 4.2.13 a) The Management Company may introduce more Administrative Plans over the Fund in the future with a prior notice of minimum 7 days to Unit Holders after seeking prior approval of the Commission.

Risks Associated with Administrative Plans:

The amount of disbursement in case of Income Units with Flexible Income Option may go down or up in line with the diminution or appreciation in the NAV during the Regular Interval.

As a result of operation of Fixed Regular Payments, the principal capital invested by unit holders may deplete in case appreciation of the principal investment (net off Front-end Load and any applicable duties, charges and taxes) during the regular interval is not sufficient to cover the fixed cash amount specified by the Unit Holder.

Price of units and their subsequent income may go up or down as market conditions so warrant. If income generated from the growth in investment value outweighs the fixed cash amount, as specified by an investor then the capital of the investor shall not deplete. On the contrary, if income generated from the growth in investment value becomes lower than the fixed cash amount being paid to an investor then this will lead to a reduction in the actual invested amount. If such a scenario emanates and growth factors dampen with respect to the fixed cash amount then the investor is susceptible to capital depletion. If such conditions persist. The investor may opt to convert their plan from fixed income to flexible income units.
