ECONOMIC REVIEW

Headline inflation stood at 9.2% YoY in Jul`26, higher than 4.1% in Jul`25, while CPI increased by 1.2% MoM. The YoY increase was primarily driven by Transport (+15.1%), Communication (+13.6%), Miscellaneous Goods and Services (+10.8%), and Food (+10.6%). The monthly increase was mainly attributable to a (+0 4.2%) rise in food prices, while core inflation remained elevated at 8.5% YoY. On July 27, 2026, the SBP maintained the policy rate at 11.5%, reflecting a cautious stance amid elevated inflation and persistent geopolitical risks. Economic activity is showing signs of recovery, with real GDP growth projected at 3.5%-4.5% in FY27, supported by improving private-sector credit and ongoing policy measures. Pakistan`s external position has also strengthened, with SBP`s foreign exchange reserves exceeding USD 18bn at end-Jun`26 and projected to reach USD 20.2bn by end-Dec`26. The current account recorded a modest deficit of USD 139mn in FY26 and is expected to remain contained within 0%-1% of GDP in FY27, despite a projected widening in the trade deficit, supported by continued growth in workers` remittances. The next MPC meeting is scheduled for September 14, 2026. Pakistan`s economic outlook remains cautiously positive, underpinned by a gradual recovery in economic activity, resilient workers` remittances, improving external-sector indicators and continued macroeconomic stability. However, elevated inflation, volatile global commodity prices, geopolitical developments and external financing requirements remain key risks to the outlook.

MONEY MARKET REVIEW

With the SBP keeping the policy rate unchanged at 11.5%, secondary market yields moved across the curve. Short-term yields settled at 11.45%, 11.65%, and 11.81% for the 3-month, 6-month, and 12-month tenors respectively, while the longer tenors settled at 11.66% and 11.99% for the 5-year and 10-year. The Government held two T-bill auctions in July. The 1-month and 3-month papers witnessed a decline of 45bps and 23bps respectively, with cut-off yields settling at 11.35% and 11.51%. The 6-month and 12-month papers saw a rise of 5bps and 16bps respectively, with cut-off yields settling at 11.79% and 11.99%. The government raised 2,836 bn through this operation. In the fixed PIB auction, PKR 596.6bn was raised against a PKR 350bn target. Additionally, the government raised PKR 240.54bn via GIS-FRD, PKR 173.16bn from GIS-FRR, and PKR 245.3bn from GIS-VRR. The SBP is expected to maintain a cautious stance going forward. Market yields are likely to remain soft amid improved liquidity and the current policy setting; however, any rise in inflation particularly driven by higher oil prices due to prevailing geopolitical conditions could exert upward pressure on yields.

EQUITY MARKET REVIEW

Pakistan`s equity market had a turbulent month, with the benchmark KSE-100 Index falling 4,207 points, down 2.33% MoM, to close at 176,094.12. The decline was mainly attributed to heightened geopolitical uncertainty, rising international oil prices, and a cautious investment stance ahead of key economic and policy developments. The average daily traded volume during July increased to 845.1 million shares from 836 million shares in June 2026, up 1% MoM. However average daily traded value declined to USD 134.9 Million from USD 142 Million in the previous month, down 5% reflecting a shift towards lower priced scrips despite rise in volume. Foreign investors were net buyer of USD 34.42mn. Domestically, individuals led buying with USD 23.4mn, followed by mutual funds USD 22.35mn, while banks were major sellers with USD 60mn. The KSE-100 Index is expected to remain sensitive to geopolitical developments during Aug`26, with any improvement in regional tensions likely to support investor sentiment, while further escalation may pose downside risks. The ongoing corporate results season and the MSCI Frontier Markets Index Review scheduled for Aug 12, 2026 will remain key market catalysts. Meanwhile, inflation is expected to remain contained, supported by lower petroleum and LPG prices, although higher food prices may continue to exert upward pressure.

HBL Multi Asset Fund

July 2026

INVESTMENT OBJECTIVE

The objective of the Fund is to provide long-term capital growth and income by investing in multiple asset classes such as equity, equity-related instruments, fixed-income securities, continuous funding system, derivatives, money market instruments, etc.

FUND MANAGER'S COMMENTS

The average daily traded volume during July increased to 845.1 million shares from 836 million shares in June 2026, up 1% MoM. However average daily traded value declined to USD 134.9 Million from USD 142 Million in the previous month, down 5% reflecting a shift towards lower priced scrips despite rise in volume. Foreign investors were net buyer of USD 34.42mn. Domestically, individuals led buying with USD 23.4mn, followed by mutual funds USD 22.35mn, while banks were major sellers with USD 60mn. The KSE-100 Index is expected to remain sensitive to geopolitical developments during Aug`26, with any improvement in regional tensions likely to support investor sentiment, while further escalation may pose downside risks. The ongoing corporate results season and the MSCI Frontier Markets Index Review scheduled for Aug 12, 2026 will remain key market catalysts. Meanwhile, inflation is expected to remain contained, supported by lower petroleum and LPG prices, although higher food prices may continue to exert upward pressure

HBL Equity Fund

July 2026

INVESTMENT OBJECTIVE

The fund objective is to provide its investors maximum risk adjusted returns over longer investment horizon by investing in a diversified equity portfolio that offers both capital gains and dividend income.

FUND MANAGER'S COMMENTS

The average daily traded volume during July increased to 845.1 million shares from 836 million shares in June 2026, up 1% MoM. However average daily traded value declined to USD 134.9 Million from USD 142 Million in the previous month, down 5% reflecting a shift towards lower priced scrips despite rise in volume. Foreign investors were net buyer of USD 34.42mn. Domestically, individuals led buying with USD 23.4mn, followed by mutual funds USD 22.35mn, while banks were major sellers with USD 60mn. The KSE-100 Index is expected to remain sensitive to geopolitical developments during Aug`26, with any improvement in regional tensions likely to support investor sentiment, while further escalation may pose downside risks. The ongoing corporate results season and the MSCI Frontier Markets Index Review scheduled for Aug 12, 2026 will remain key market catalysts. Meanwhile, inflation is expected to remain contained, supported by lower petroleum and LPG prices, although higher food prices may continue to exert upward pressure

HBL Islamic Asset Allocation Fund

July 2026

INVESTMENT OBJECTIVE

The objective of the Fund is to provide superior returns through investments in Shariah Complaint equity securities and Shariah Compliant income /money market instruments.

FUND MANAGER'S COMMENTS

The average daily traded volume during July increased to 845.1 million shares from 836 million shares in June 2026, up 1% MoM. However average daily traded value declined to USD 134.9 Million from USD 142 Million in the previous month, down 5% reflecting a shift towards lower priced scrips despite rise in volume. Foreign investors were net buyer of USD 34.42mn. Domestically, individuals led buying with USD 23.4mn, followed by mutual funds USD 22.35mn, while banks were major sellers with USD 60mn. The KSE-100 Index is expected to remain sensitive to geopolitical developments during Aug`26, with any improvement in regional tensions likely to support investor sentiment, while further escalation may pose downside risks. The ongoing corporate results season and the MSCI Frontier Markets Index Review scheduled for Aug 12, 2026 will remain key market catalysts. Meanwhile, inflation is expected to remain contained, supported by lower petroleum and LPG prices, although higher food prices may continue to exert upward pressure

HBL Islamic Stock Fund

July 2026

INVESTMENT OBJECTIVE

The objective of the Fund is to achieve long-term capital growth by investing mainly in Shariah Compliant equity securities.

FUND MANAGER'S COMMENTS

The average daily traded volume during July increased to 845.1 million shares from 836 million shares in June 2026, up 1% MoM. However average daily traded value declined to USD 134.9 Million from USD 142 Million in the previous month, down 5% reflecting a shift towards lower priced scrips despite rise in volume. Foreign investors were net buyer of USD 34.42mn. Domestically, individuals led buying with USD 23.4mn, followed by mutual funds USD 22.35mn, while banks were major sellers with USD 60mn. The KSE-100 Index is expected to remain sensitive to geopolitical developments during Aug`26, with any improvement in regional tensions likely to support investor sentiment, while further escalation may pose downside risks. The ongoing corporate results season and the MSCI Frontier Markets Index Review scheduled for Aug 12, 2026 will remain key market catalysts. Meanwhile, inflation is expected to remain contained, supported by lower petroleum and LPG prices, although higher food prices may continue to exert upward pressure
